Portfolio: nil1143.com

Aspiring frontend developer with experience building and deploying full-stack projects. Comfortable working with React, modern JavaScript, and Tailwind. I focus on delivering accessible, performant, and maintainable user interfaces. Seeking an entry-level role where I can contribute to real products and continue growing my skills.

PROJECTS

Streamify Chat App— *Readme* and *Live*

React app (Vite) built on the MERN stack with a production-ready backend. Frontend focuses on discovering language partners, friend-request flow, real-time chat, theming, and responsive UI.

Evently App— *Readme* and *Live*

Full-stack event management app (Next.js+ Typescript) for creating, updating and deleting events. Features secure user authentication, real-time updates, and Stripe checkout for ticket purchases.

Job Search App — *Readme* and *Live*

MERN application built with Next.js and TypeScript. Connects job seekers and employers with features for listings, profiles and secure workflows.

WORK EXPERIENCE

Freelance Frontend Developer — *Independent / Contract*

Apr 2024 - Sep 2024

Built responsive, accessible front-end interfaces using React and modern CSS. Implemented client-side state, integrated REST APIs and handled authentication, then deployed to Vercel and iterated based on client feedback. Collaborated directly with founders and designers to scope work and maintain documentation.

Viagogo, Customer service assistance — *Remote*

Sep 2022 - Jun 2023

Provided remote customer support for event and ticket issues via phone and email, resolving inquiries and managing refunds and escalations. Coordinated with cross-functional teams and documented recurring issues.
